DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 29, 25, 24, 31, 13-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 29 is indefinite in that it depends from cancelled claim 9. Clarification and correction are required. Claim(s) 25 fail(s) to recite sufficient structural elements and interconnection of the elements to positively position and define : 1) the arcuate shape "**corresponding**" to a portion of the side walls; 2) the first and second side walls (claim 25); 3) "the outer surface and **extending** with respect to the first end portion (wrt?) (claim 13, lines 8, 16) so that an integral structure able to function as claimed is recited.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 25, 24, 31 so far as definite, are rejected under 35 U.S.C. 102(b) as being anticipated by Weitzman et al ('025). The patent to Weitzman et al teaches structure as

Art Unit: 3637

claimed including desk, legs pivotally connected and having a concave portion, the concave portion forms a handle (figs. 1-4), each leg comprising opposing edge portions having an arcuate shape, each of the opposing edge portions curving inwardly with respect to the portable desk and the arcuate shape corresponding to at least a portion of one of a first side wall and a second side wall of the base, so far as definite. It is noted that the leg structure of Weitzman includes a thickness, which would include a plurality of edge portions and therefore would include all structure as claimed, so far as defined. It is noted that an opening is defined as "a hole or void in something solid" (Random House College Dictionary).

Allowable Subject Matter

Claims 1, 2, 5-8, 11, 12, 30 are allowable over the prior art of record.

Claims 13-20, 22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
